

# Doo Good

Pick up dog doo. Protect streams.

Dog Doo is more than a nuisance!

## 1 It spreads disease

like Giardia and accounts for up to **20%** of the bacteria in our waterways.

## 2 It hurts fish

by adding nutrients in streams which act like a fertilizer making algae grow and reducing oxygen for fish.

## 3 It adds up!

Locally there are **90,000** dogs that make **11,700** tons of poop a year.
